

LYNX[®]

VISION QUALITY INSPECTION SYSTEM

NON-COMPLIANCE CONTROL

AUTOMATIC SYSTEM

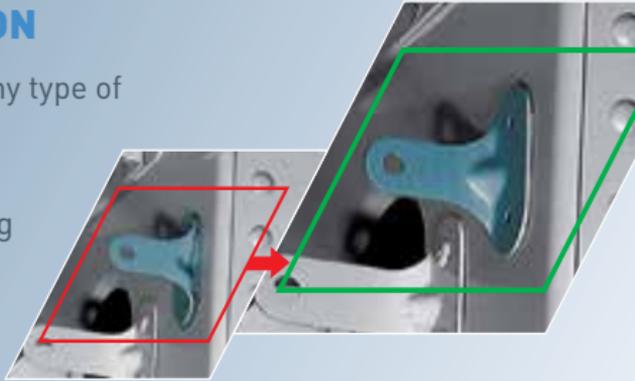

LYNX is an **industrial vision** system to service quality control.

It **secures** and significantly **reduces** your **control times** by avoiding manual verification.

INSPECTION

LYNX **detects** any type of **non-compliance**:

- Missing part
- Improper mounting
- Damaged part
- Colorimetry, Texture analysis...

HIGH TECHNOLOGY

LYNX uses advanced processes that include:

- **Artificial Intelligence** algorithms
- High performance **optical filters** to fit environment

PERFORMANCE AND SPEED

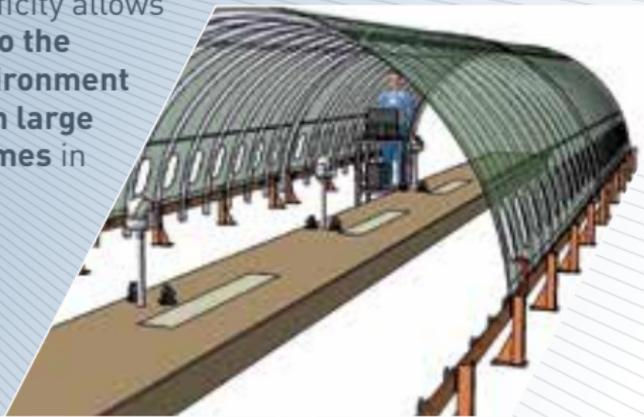

- Up to **1,500 parts** controlled in less than **1 hour**
- **Real time** results

FLEXIBILITY AND INTEGRATION

The control cell may consist of one or more **robotic cameras**, connected RJ45.

This specificity allows it to **adapt to the working environment** and **cover both large and small volumes** in a single control.
